

Author Once, Use Anywhere!

Each of the stand-alone products in the Vcommunicator® Authoring Suite unite to allow customers to develop 3D character animations that result in revolutionary and engaging media. Files are exportable to a variety of applications across multiple platforms including hand-held mobile devices, such as iPods, PDAs and smart phones fulfilling Vcom3D's promise of "Author Once, Use Anywhere!"

The flexibility of outputs and ease of use results in users quickly and affordably creating and enhancing high impact connections with their internal and external audiences. The products are available for Microsoft® Windows and are Vista compatible.

Plus these 8 life-like characters!

The Vcommunicator Authoring Suite includes two great products:

Studio

&

Gesture BUILDER

Features:

- Automated lip-synchronization
- Realistic dialog and emotion
- Searchable gesture & expression libraries
- Eight multi-cultural characters
- Export to Apple QuickTime® & Microsoft Windows Media™ or as elements for Adobe Flash® & Captivate™
- Easily integrate new or custom characters from Vcom3D

Benefits:

- No annual contracts or fees
- Save time and development costs vs video
- Create platform independent content
- No software animation experience needed
- Easily update, revise and re-publish
